Precision point

Durability – of up to **8,0 times**
compared to swept point 200-standard

1 **Special wear protection**
For bolt holes and bolt heads

2 **Additional steel in the main wear zone**
Higher service life, „soil-to-soil“ effect

3 **Beaver tooth effect**
- Non-compacting cut with minimal silty areas
- Stepped cutting edges for an absolutely uniform cut, even in intensive growth

4 **Tungsten tip**
Top with an open angle for a better penetration even in extremely hard soils

Fields of application:
- Uniform cut
- Optimal for the 2nd and 3rd stubble processing and a flat mechanical weed control
- For highest demands on work quality and soil structure
- In the case of a strong weed infestation
- Small to very high area performances

GÜTTLER®
Leading in Soil Structure

Super Maxx® BIO

Facts at a glance:
- Working width 3.00 to 9.00 m for head stock, 10.00 and 12.00 for transport wheels
- Options: strengthened gauge wheels, rear gauge wheels point configurator, 2nd harrow row

Ihr Vorteil:
- The 7-rows plant protection
- Easy to pull
- High area performance up to 15 km/h
- Mechanical weed control with swept point 200
  - ✓ uniform cutting
  - ✓ soil removing and eliminating with the harrow
  - ✓ drying up on the surface
- With narrow point perfect for
  - ✓ the 1st and 2nd stubble processing
  - ✓ for aerating the seedbed
  - ✓ for working in catch crops

The roller with the golden hoofprint®
The Original. Since 1978

Equipment :

Tips!

Narrow point: standard 60 mm
For all conditions. For aerating and und loosening, for very flat and deeper working

Narrow point with tungsten tip: 50 mm
For all conditions. Narrow point for longer service life for high wearing soils.

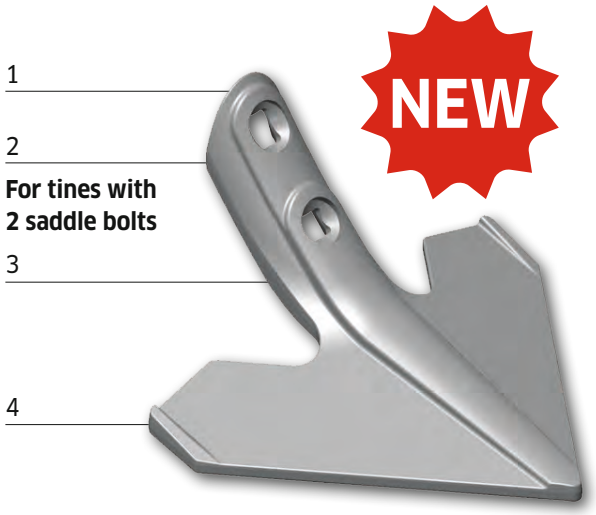

Swept point: standard 200 mm
For normal conditions. Uniform and flat cutting of weeds and volunteer grains.

Forged point: 200 mm
For dry and normal conditions. Swept point with a longer service life for very high wearing soils.

Precision point: 200 mm
For all conditions. Swept point for maximum service life on all soil types. Non-compacting and sharp cut even in humid conditions.

Forged point

Durability – of up to **2,5 times** compared to swept point 200-standardd

1 **Montage**
Improved hold on the tine

2 **Special wear protection**
For bolt holes and bolt heads

3 **Additional steel in the main wear zone**
Higher service life, „soil-to-soil“ effect

4 **Side wings**
- Improvement of the mixing effect
- Maintains the working width up to the wear limit

Fields of application:
- Uniform cut
- Optimal for the 2nd and 3rd stubble processing and a flat mechanical weed control
- Optimal on high wearing soils
- Medium to high area performances
