GÜTTLER®
Leading in Soil Structure

The roller with the golden hoofprint®

Optimal for pastureland

Already our great-grandfathers knew the effects of animal hooves on pastures

- Makes turfs denser, more stable, and more fertile!
- Provides soil contact to ensure successful reseeding!

Optimal for agriculture
No capping – smoothly rolling

The roller with the golden hoofprint® for an optimal seedbed on the field:

- Firm and fine below – perfect seed embedding
- Above loose and crumbly – perfect capping protection, no drifting, valuable soil moisture is preserved

Magnum 1240 – 8 pendular elements

The all-season device from GÜTTLER®

- Professional pastureland maintenance with or without GreenMaster for seeding or reseeding of pastureland
- Rolling before and after seeding
- Rolling nurse crop in corn fields
- Rolling winter killed seedings, stimulate tillering
- Rolling-in catch crops (after seeding)
- Effektive corn borers combating
- Flattening catch crops – greening-conform

Combating corn borers

The GÜTTLER® Prism Roller® is suitable for combating corn borers. From Master 940 with an optional NonStop harrow, which reliably flattens maize stalks so that they can be easily shredded by the roller.

- 3D Ground contouring
- Even extremely flattened stalks are shredded – „hammer anvil effect“
- 305 Prism points per m^2
- Not a specialised machine, but an all-season machine

Catch crop management

The GÜTTLER® Prism Roller® for an entire catch crop management.
During sowing, the roller ensures the necessary reconsolidation and perfect seed embedding.
Valuable soil water is preserved.

- Rolling during flowering – prevents lignification
- Rolling during alternating frosts – Glyphosat effect
- Further rolling during alternating frosts for best shredding results.

3D Ground contouring
