The roller with the golden hoofprint®

Optimal for arable
No capping – carefree rolling

The roller with the golden hoofprint® for an optimal seedbed in the field:

- Firm and fine below – perfect seed embedding
- Above loose and crumbly – best capping protection, not drifting, preserves valuable moisture

NEW Feldmeister®
LK 60

Seedbed preparation with impact and moderate wear

- Less passes
- Intensive crumbling, perfect soil structure
- Opitmal reconsolidation of the soil

GÜTTLER®
Leading in Soil Structure

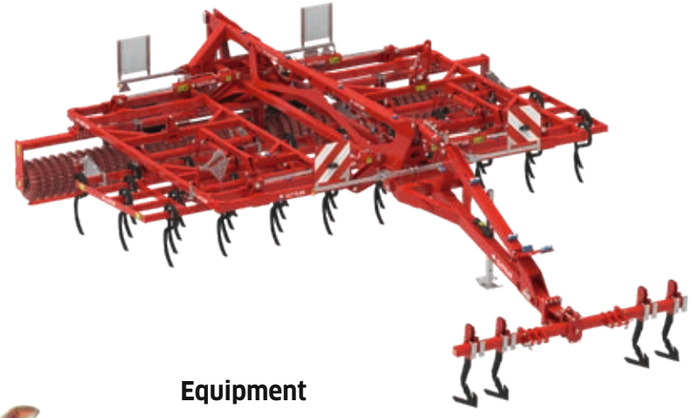

Feldmeister® LK 60

Advantages at a glance

Efficient
Five processes in one – levelling, loosen, aerate, crumble, reconsolidate.

Versatile
Optimal for seedbeds, stubble processing and catch crops. 5-rows – large working capacity, even on heavy soils.

Proven
Over 40 years GÜTTLER® quality – proven, fast and cost-effective.

Technology

- 6,00 metres working width
- 2,45 metres transport width

Equipment

- Loose tines to break up the tractor tracks
- FlatSpring or Ripperboard QUATTRO front implements for optimal preparation of heavy soils
- 5-rows tines for best crumbling
- Trailing roller SX 56 – alternatively Matador 45/50
- Hydraulic depth adjustment as standard
- Following harrow
- Levelling bar in front of the roller
- Compressed-air brakes 2-circuit system

GÜTTLER

Feldmeister® LK 60

Feldmeister® – your key to strong crops and better yields

On heavy soils, the plough leaves large clods and an uneven terrain.

Der GÜTTLER® Feldmeister® can eliminate these. The levelling bar levels and fills the rough furrows. the robust spring tines mix, crumble und level. The integrated GÜTTLER® roller then ensures intensive clod crushing.

The best conditions for eine optimal seed placement, improved field emergence and strong crops.

Feldmeister® – This is how it creates an optimal seedbed

The robust tines loosen, aerate and crumble the soil – they mix in plant residues, without burying them so that they rot quickly.

The narrow tines (45 x 12) have a spacing of 13 cm and can even withstand heavy soils or stones. The double blade reinforced tines are extremely robust. The proven tines bring up less moist soil, stones or plant residues.

Perfect seedbed:
Firm and fine below, above loose and crumbly

Optimal for a powerful seedbed preparation.
