GÜTTLER® Super Maxx® CultiSem- winter wheat preparation

Super Maxx® CultiSem
6.0 m hydraulic folding 5-rows

The Super Maxx® CultiSem is the new powerful planting seeder from GÜTTLER®.

The CultiSem combines the advantages of high-precision sowing of market crops with minimal tillage and effective erosion prevention.

Thanks to the vibrating tines, the seed is placed precisely even on moist soils – without capping and no silty areas.

- Narrow point with tungsten tip 36 mm with sowing coulter
- Seed tubes with two distributors
- RollFix Ø 45 cm synthetik ultra
- Optional with loose tines and harrow behind roller
- Optional with GÜTTLER® front seeder

Advantages on the field

The Super Maxx® CultiSem combines powerful soil processing with precise seeding technology in a 5-rows design. Points with tungsten tips, RollFix roller, and optional following harrows ensure a perfect seedbed, while the seeds are distributed precisely by the GÜTTLER® front seeder with a Simplex 56 support roller.

Two distributors ensure uniform sowing across the entire working width – for maximum efficiency in the field.

- Powerful 2-in-1 solution, efficient combination of soil cultivation and sowing
- Maximum performance with minimum effort
- Cultivation which prevents erosion
- Low investments
  low input – high output
- Up to 15% higher area performance

Technical data

Field emergence winter wheat

The agronomical advantages

The vibrating tines produce enough fine soil during sowing to ensure that the seed is well embedded, with the help of the integrated sowing coulter.

The Simplex roller then ensures uniform recon-solidation, thereby providing reliable protection against wind, soil and water erosion.

This ensures that the seedling has ideal conditions for strong and uniform emergence, even in moist and heavy soils.
