

GÜTTLER® Super Maxx® CULTI 5-rows

Super Maxx® CULTI

30-5 | 50-5 | 60-5 **5-rows**

Those looking for a 'classic' machine with roller for preparing seedbeds after ploughing, will be very satisfied with the Super Maxx® CULTI.

- ✓ Sturdy double-sprung tines
- ✓ Tine spacing 130 mm
- ✓ Levelling bar
- ✓ RollFix-roller 45 cm made from durable synthetik ultra (proven in large numbers since 1995)
- ✓ Road lighting kit (LED)
- ✓ Optional: front gauge wheels, front FlatSpring, pneumatic seeder, following harrow

Technical data

The soil-protecting concept – variable reconsolidation from 0 to 100%

When working on moist soils, such as when incorporating slurry, the optional front gauge wheels ensure particularly soil-friendly processing. This allows the pressure on the RollFix roller to be continuously adjusted depending on soil moisture and soil conditions.

This ensures that the soil is not unnecessarily compacted, and that its natural structure is preserved.
The drier the soil, the firmer the reconsolidation can be adjusted. This ensures optimal results in all conditions.

GÜTTLER® Super Maxx® BIO – the 7-rows all-rounder

Super Maxx® BIO

30-5 | 50-5 | 60-5 | 90-5 **5-rows**
30-7 | 50-7 | 60-7 | 70-7 | 90-7 **7-rows**
60-7 | 70-7 **7-rows Heavy Duty**

The soil-protecting concept without roller

Can be used reliably all year round

- Flat stubble processing (max. 15 cm deep)
- Mechanical weed control
- Aerating moist soils
- Incorporating slurry

Features

- ✓ Front gauge wheels
- ✓ Tine row – No clogging, large passage
- ✓ Double blade reinforced tines with high-frequency vibrations thanks to progressive characteristic
- ✓ Harrow with tines Ø 12 mm
- ✓ Road lighting kit (LED)
- ✓ Optional rear gauge wheels – with upper link fastened with bolts in slotted hole

Mechanical weed control –
The 7-rows crop protection sprayer

- Uniform cut
- Soil removing and raking with a harrow
- Drying on the surface

Depth control of the machine via front gauge wheels – the machine does not rest on a support roller, which would press the cut weeds back onto the soil.

GÜTTLER

GÜTTLER® Super Maxx® Heavy Duty

Catch crop management

- Catch-crop management starts with sowing and ends with incorporation.
- Once the catch crop has been rolled several times using the GÜTTLER® Prismenwalze® for to take advantage of the glyphosate effect not only during the two-stage emergence of the catch crop, and in the event of alternating frost, the appropriate incorporation method is crucial.
- Preserve soil structure – cost-effective seedbed preparation with the SuperMaxx® BIO.
- Optional in combination with the knife roller for für optimal shredding.

Agrigulture recommendation of GÜTTLER®

First and second stubble processing with narrow points – process diagonally crossed.

First process with narrow points: break capillary, the soil-straw-mulch cover causes a mini greenhouse effect for germination of weeds and volunteer cereals. Preserves valuable moisture.

Second process with narrow points: work through completely mixing the straw into the topsoil, combat growth.

Third process with swept points: for flat, complete cutover

Our point primer provides detailed information

All over cut thanks to 200 mm wide swept points with 70 mm overcut (tine spacing: 130 mm)
