- Trailing roller Simplex 45 special cast iron
- Road lighting kit (LED)
- Lower link hitch cat. 2 and 3
- Optional: hydraulic adjustment for depth and levellinging disc, and mechanical stone protection

Technical data

Advantages in the field

Thanks to its three-row design and points, the PrimusPlus is ideal for medium to deep tillage. This combination ensures intensive mixing and processes easily even large quantities of organic material. This ensures that the soil remains active and alive, providing food for soil organisms throughout the year.

The proven GÜTTLER® SIMPLEX trailed roller ensures with its crumb structure a perfect finish, promotes gas exchange, and creates a stable, fine, and crumbly surface.

The plant cultivation advantages

This innovative cultivator creates an open, loose soil structure that provides ideal conditions for healthy growth.

The prism profile creates an aerated seedbed and reliably protects against wind and soil erosion, providing the ideal conditions for plant growth and optimal yields.
