A GÜTTLER® front device pays for itself! Unbeatable on both light and heavy soils!

Maximum performance on heavy soils!

- Perfect reconsolidation – tracks less deep
- Optimal seedbed without smearing the soil
- More yield with the GÜTTLER® front press

Protect structures and create ideal sowing conditions, even in unfavourable weather.

- Less seed required
- Faster field emergence
- Uniform stocks
- Lower risk of winterkill

Front presses
Avant & DUPLEX®

GÜTTLER® - front presses from the specialist. The all-rounders on all soils.

Actively working - instead of dead front ballast

GÜTTLER®
Leading in Soil Structure

Save work, time, and money!

Active front device – instead of dead front ballast

- Levelling, crumbling, reconsolidation
- Tractor tracks less deep
- Balanced weight distribution = soil protection
- The reconsolidated seedbed ensures more uniform seed placement.

No increased power demand – higher area performance

- The tractor rolls more easily on leveled and reconsolidated tracks
- The power harrow can work more flatly
- The power demand of the power harrow is drastically reduced, enabling significantly higher area performance
- Thanks to GÜTTLER® front packers, soil preparation in a single pass not only protects the soil, but also saves you work, time and money.

Ensures a good seedbed

Front presses are ideal for heavy soils and perfect for light soils, as they ensure an excellent crumbling and reconsolidation.
For example, in spring on winter killed furrows.
Levelling with flat-adjusted tines means that damp soil is not brought to the surface.
And because the tractor only tracks minimally, the power harrow can be driven very flat. The soil contact in front of the sowing coulter ensures flat en even seed placement.

Actively working instead of dead front ballast

GÜTTLER

Avant – for heavy, crumbly soils

Avant 45
2,50 – 3,00 m rigid frame

As standard, complete with Simplex rollers made of robust special cast iron, tined unit and side plates.
This series is developed for medium to heavy, crumbly soils.

Avant 56
2,50 – 4,00 m rigid
4,10 – 7,20 m hydraulic folding

For heavy tractors and high speed, stone and break-proof cast iron. The Avant 56 is designed for light and sandy soils up to heavy and crumbly soils.

Avant 56

Technical Data

DUPLEX® – für heavy, non-crumbly soils

DUPLEX® 45
2,50 – 4,00 m rigid, 4,10 – 6,0 m hydraulic foldable

Breakproof in special cast iron. The massive Prismenwalze® for midium to heavy, crumbly soils.

DUPLEX® 56
2,50 – 4,00 m rigid, 4,10 – 6,0 m hydraulic foldable

The DUPLEX® is designed for heavy tractors and high speeds. For light, sandy to extremly heavy soils.

DUPLEX® 45 and 56 foldable

Hydraulic folding – this way, even large working widths are transportet safely.

DUPLEX® foldable
