GÜTTLER®
Leading in Soil Structure

Ideal for contractors: Two steps in one! At the front: Remove felt and grass residue from the turf – at the rear: reseed under optimal conditions

GreenMaster Compact
6,00 m foldable

The new GreenMaster Compact offers maximum efficiency for smallest spaces. The tine row in combination with the proven Mediana Prismenwalze® ensures optimal pasture maintenance in just one working pass. Thanks to its compact design, the device is highly versatile and the perfect solution for smaller structures and contractors.

- 2 rows NonStop spring tines Ø12 mm, space between tines 75 mm
- Tine loss prevention
- Hydraulic folding with pressure compensation
- Integrated Prismenwalze® Ø 33/38 cm
- U-stands for parking in transport- und working position
- Optional Hydraulic depth adjusment of the roller and hydraulic tilt adjustment of the harrow

The advanteages of the GreenMaster Compact System

The GreenMaster Compact series is the new harrow for grassland from GÜTTLER®:

- ✓ Compact design
- ✓ Modular system
- ✓ Powerful concept, even on different agricultural land
- ✓ Rollers quickly to remove, optional gauge wheels
- ✓ Optional: hydraulic adjustment

Technical data

GÜTTLER

Planting of catch crops with hugh performance at a moderate price

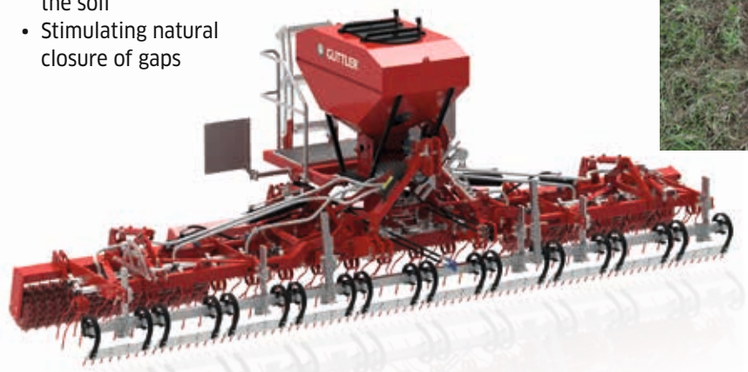

GeenMaster Compact – the ideal grass combination for slopes

Successful pasture management

Pasture management in spring
- Closing gaps, levelling mice and molehills, stimulate tillering, spreading slurry

Remediation pasture in summer
- Raking meadow grass
- Creating space for seeds

Reseeding pasture in autumn
- Ensuring seed potential in the soil
- Stimulating natural closure of gaps

System GreenMaster for meadow processing

1. The weather must be favourable
2. Harrow several times crosswise
3. Removing the raked meadow grass
4. Reseeding – requires light, air, water, and good soil contact
5. Quick separation of the harrow and roller

Effective against meadow grass
